PROFESSIONAL SUMMARY

iOS Engineer with 5+ years of professional experience building and shipping production-ready applications with Swift, SwiftUI, UIKit and modern iOS technologies. Experienced across the full application lifecycle from requirements and architecture through implementation, API integration, testing, App Store release and ongoing maintenance. Strong hands-on experience with Swift Concurrency, Firebase, REST APIs, reusable components and maintainable application architecture.

CORE TECHNICAL SKILLS

iOS	Swift, SwiftUI, UIKit, iOS SDK, iPadOS, Xcode, Apple Human Interface Guidelines
Architecture	MVVM, MVC, Clean Architecture, Dependency Injection, reusable UI components, modular design
Concurrency	Swift Concurrency, async/await, Actors, Structured Concurrency
Networking & Backend	REST APIs, URLSession, JSON, Firebase, API integration, third-party services
Data	SwiftData, Core Data, UserDefaults
Testing & Release	XCTest, Unit Testing, UI Testing, App Store Connect, TestFlight, StoreKit, In-App Purchases
Tools	Git, GitHub, CI/CD, debugging, performance optimization

PROFESSIONAL EXPERIENCE

Across Infotech Oct 2022 - Present iOS Developer

- Develop and maintain production iOS applications using Swift, SwiftUI and UIKit across ongoing product development and release cycles.
- Build and ship application features by integrating REST APIs, Firebase services and native iOS frameworks.
- Work across the application lifecycle, including requirements analysis, implementation, debugging, testing and production release.
- Develop reusable UI components and application modules with a focus on clean, maintainable and scalable code.
- Investigate and resolve production issues involving UI behavior, networking, API integration, application performance and crashes.
- Collaborate with backend developers, designers, QA and product stakeholders to translate requirements into production-ready features.
- Participate in code reviews, technical discussions, testing and continuous improvements throughout the development lifecycle.

Valora Infotech Jan 2019 — Feb 2022 iOS Developer

- Developed and maintained production iOS applications using Swift and UIKit across multiple product requirements and release cycles.

- Implemented application features and user interfaces while integrating REST APIs, Firebase services and native iOS frameworks.
- Built reusable UI components and application modules with a focus on clean, maintainable and well-structured code.
- Investigated and resolved issues involving UI behavior, API integration, networking, application performance and production crashes.
- Participated in code reviews, debugging, testing and release preparation throughout the development lifecycle.
- Worked closely with backend developers, designers, QA and stakeholders to implement features and resolve technical issues.

SELECTED PROJECTS

InvoAlce - Founder · Product Developer · iOS Engineer

AI-powered invoicing for freelancers, consultants and small businesses · Live on the App Store

- Independently designed, developed, tested and shipped the product from concept through App Store release.
- Built the iOS architecture and SwiftUI interface with reusable components and production-focused application structure.
- Integrated Firebase, REST APIs, Swift Concurrency, AI-assisted invoice generation and voice-based invoice creation.
- Implemented subscriptions and in-app purchases with StoreKit, plus PDF invoice export, reporting and cross-device data synchronization.
- Own ongoing debugging, performance improvements, release management, maintenance and product iteration.

GutPrana - iOS Developer

Client-owned production iOS application

- Developed the iOS application end-to-end using Swift and SwiftUI, including screens, navigation and user flows.
- Integrated REST APIs and Firebase services and handled client-server data flows.
- Built reusable UI components, maintained application-level architecture and supported debugging, testing and production release.

ADDITIONAL PROJECT

Siddhyog - Solo iOS Developer(App terminated)

Meditation application · Swift · UIKit · Firebase · Push Notifications

- Designed, developed and deployed a functional meditation app using Swift, UIKit and Apple Human Interface Guidelines.
- Integrated Firebase and push notifications to support application engagement.
- Successfully launched on the App Store before the product was discontinued.

EDUCATION

- Kalinga University — M.Sc. in Computer Science, 2018
- Kalinga University — Bachelor of Computer Application

CERTIFICATION

- [iOS & Swift -The Complete iOS App Development Bootcamp](#)

LANGUAGES

English · Hindi · Gujarati
